The Centre for Brain Research (CBR), an autonomous centre of Indian Institute of Science, invites applications for the position of faculty and post-doctoral fellows. CBR is dedicated to finding early diagnoses and rational therapies for neurodegenerative diseases through better understanding of brain function. CBR fosters inter-disciplinary neuroscience research and is currently recruiting neuroscientists, clinicians, engineers and computational scientists, who would work together to reduce the burden of dementia and other neurodegenerative disorders. Candidates with experience in cognitive neuroscience, epidemiology, brain imaging, computer science and genetics are encouraged to apply.

**Faculty Positions:**
Appointments will be at a level equivalent to Assistant Professor or above. Demonstrated record of independent scientific research in the form of peer-reviewed publications is essential. Level of appointment will be based on experience and quality of scientific productivity.

**Postdoctoral Fellows:**
The fellowship offers the successful candidates a unique platform for professional advancement. Applications for the fellowship are strongly encouraged from those who have recently finished their doctoral dissertation. More advanced scholars will also be considered.

Interested candidates may send their curriculum vitae (with date of birth, nationality, qualifications, professional experience, positions held, list of publications) and the names, addresses, telephone/fax numbers and email addresses of 3 referees to:

Director,
Centre for Brain Research,
Indian Institute of Science,
Bangalore 560 012, India.
Tel: +91 80 2293 3588
e-mail: director.cbr@iisc.ac.in

More information on CBR can be obtained at: [https://www.cbr.iisc.ac.in](https://www.cbr.iisc.ac.in)

Interested candidates can contact the CBR exhibit booth no.4203 at the Society for Neuroscience meeting (SFN 2018) at San Diego, USA.
